

## ANGOLA

The first years of life are critical to a child's future success. Episcopal Relief & Development is committed to partnering with parents and caregivers to nurture children up to age six so they are learning, growing and thriving in their communities.

Keeping children safe and healthy is the top priority for all parents. In many communities in Angola, the lack of clean water and adequate sanitation remains a challenge. In fact, in rural parts of the country, diarrheal diseases account for a significant number of deaths in young children.

In collaboration with Episcopal Relief & Development, the Anglican Diocese of Angola is working with local leaders, government authorities and impacted communities to improve the health and wellness of children and their families. For example, many of the program activities focus on changing structures and behaviors to help increase access to safe drinking water and sanitation facilities, as well as promote hygiene education in high-need areas.

For more information, see [Angola](#).

Your partnership empowers more families, in more places, to support more **children**.
